PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI, specializing in financial analytics, data pipelines, and dashboard development. Built end-to-end data solutions including automated analytics pipelines and interactive applications for performance and risk monitoring.

Recently contributed to a data-for-good initiative analyzing real-world survey data to support program evaluation and decision-making in a non-profit context. Strong ability to transform raw data into actionable insights through structured analysis, KPI modeling, and clear data storytelling.

TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas, NumPy, Matplotlib), SQL (PostgreSQL, MySQL), Jupyter Notebooks.
- **Data Visualization & BI:** Power BI (DAX), Tableau, Excel, Streamlit dashboards.
- **Data Techniques:** Data cleaning, EDA, data validation, KPI modeling, ETL basics.
- **Tools:** GitHub, Google Colab, VS Code, Excel Power Query
- **Domain Knowledge:** Financial analytics, portfolio analysis, risk indicators, KPIs.

PROJECTS

• Automated Market Risk & Performance Dashboard (Python, Streamlit)

Developed a multi-page interactive dashboard connected to an automated financial analytics pipeline. Enabled dynamic exploration of asset performance, risk metrics (volatility, drawdown), anomaly detection, and time-series trends. Integrated precomputed KPIs and visual analytics with user-driven filtering for real-time insights.

Skills: Python, Streamlit, Data Visualization, Financial Analytics

Repo: github.com/MayeDiaz818/market-risk-performance-dashboard

• Automated ETF Reporting Pipeline (Python)

Developed an automated pipeline for market data ingestion, cleaning, KPI computation (volatility, drawdown, returns), and anomaly detection using z-scores.

Generated structured outputs (datasets, reports, and charts) used to power downstream analytics applications.

Skills: Python, ETL, KPI Modeling, Automation

Repo: github.com/MayeDiaz818

• Financial Risk Analysis Dashboard (Python + Power BI)

Processed multi-table datasets and calculated credit-risk indicators (LDR, DTI, DAR). Designed an interactive Power BI dashboard for segmentation and risk classification.

Skills: Python, Power BI, Data Modeling

Repo: github.com/MayeDiaz818

• Retail Sales Analysis (SQL + Tableau)

Performed SQL joins, window functions, CTEs, and aggregations to explore sales patterns and customer behavior. Dashboard created in Tableau.

Skills: SQL, PostgreSQL, Tableau

Repo: github.com/MayeDiaz818

VOLUNTEER EXPERIENCE

Data Analyst Volunteer – Data for Good Toronto | 2026

- Collaborated on a real-world data analysis project using survey data from a non-profit organization focused on education programs.
- Performed exploratory data analysis and data validation to assess program outcomes and participant engagement.
- Contributed to the design of dashboards and visualizations tailored for non-technical stakeholders.
- Worked in a cross-functional team to translate data insights into actionable recommendations.

Skills: Data Analysis, EDA, Data Visualization, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Customer Service Associate – Latin Café, Toronto | Jan 2023 – Dec 2024

- Collected and analyzed daily operational data to identify patterns and service improvements.
- Reduced processing time by 15% through structured documentation and workflow adjustments.
- Maintained consistent quality standards through process tracking and reporting.

Owner-Operator – Mima's Kitchen, Las Vegas | Apr 2019 – May 2021

- Analyzed sales trends to identify profitability drivers, increasing revenue by 18%.
- Implemented inventory tracking to reduce waste by 25%.
- Managed operations using data-driven decisions for purchasing and budgeting.

Assistant Superintendent / OTACC Construction SA– Colombia | Sep 2017 – Jan 2019

- Monitored project performance, schedules, and KPIs through detailed logs and weekly reports.
- Improved documentation processes, reducing reporting time by 25%.
- Conducted inspections and collaborated with engineers to ensure compliance and resolve quality issues.

EDUCATION & TRAINING

- Data Analytics Masterclasses (Python, SQL, Excel, Power BI, Tableau) – (Udemy - Coursera 2025-2026)
- Engineering/Architecture Bridging Program – Humber College, Toronto (2023)
- B.Sc. Civil Engineering – Pontificia Universidad Bolivariana (WES Accredited) (2017)
